

Wildlife Neighbor Journal

Get to know the animals living near you.

Suggested ages 5+ with adult help | 10 minutes on three different days

A window, porch, yard, or safe community space

YOU WILL NEED

A pencil, this sheet or scrap paper, and a grown-up for outdoor visits.

1. Choose a watching spot.

Pick a safe place where you can quietly watch without approaching animals. A window works, too.

2. Observe three times.

On three different days, watch for ten minutes. Draw or write what you see. You do not need to know every animal's name.

3. Choose one caring action.

Keep pets from chasing wildlife, put litter in a bin, or remind your family to leave a nest undisturbed. Ask a grown-up to help.

EXPLORE WITH CARE

Never touch, feed, chase, or capture wildlife. Stay back from nests and young animals. Leave feathers, eggs, plants, and other natural finds where they are.

My watching spot: _____

Visit 1: _____ I saw: _____

Visit 2: _____ I saw: _____

Visit 3: _____ I saw: _____

Draw an animal you noticed.

My caring action: _____
